

Stevie Smith Boxing Academy  
Case Study

Type: Floor Coating  
Sector: Commercial

# Stevie Smith Boxing Academy

Former two time world boxing champion 'Stunning' Stevie Smith sought out the services of Vuba Flooring Limited for his new gym flooring. Stevie has trained in some of the best gyms across the world throughout his professional career, and he left it up to Vuba Flooring to provide his new gym flooring.

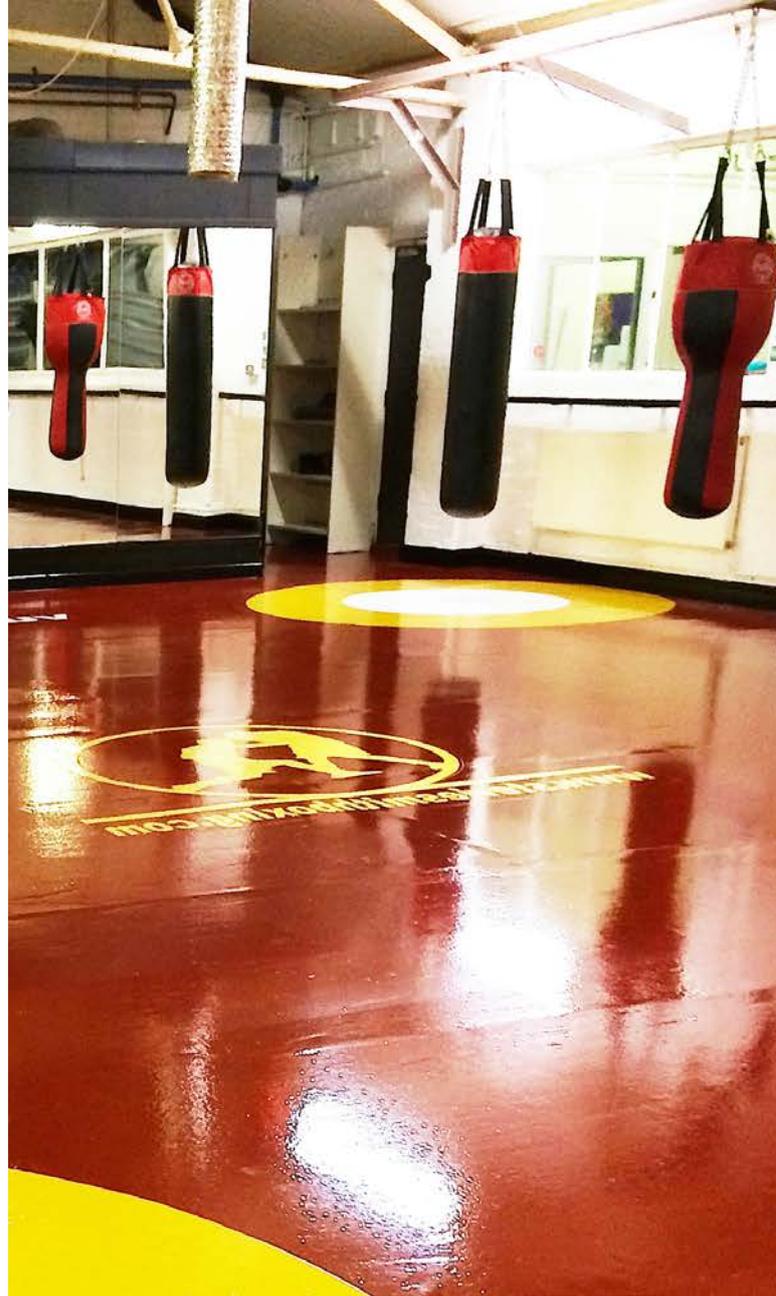

The gym had experienced a leak and the existing painted chipboard gym flooring had started to de-bond in places and the whole floor was beginning to look tired.

## Method:

We began by replacing the existing boards damaged by the water leak and mechanically sanding the existing painted wooden floor. Following that filled the gaps between boards using Epifill, a two part epoxy mortar. We then applied a primer followed by two coats of paint, before application of the stencils.

Stencils were manufactured specifically for the project. Using silver and gold glitter we installed both the gym logo and our Vuba logo on to the gym floor, as we are a sponsor of the gym. The logos were then sealed using our clear Polyspartic sealer designed to seal resin finishes with a clear and highly durable finish.

“

As soon as I met Sean from Vuba I knew I was dealing with a professional company. He was very knowledgeable about every aspect of flooring and I was impressed.

Sean recommended applying the system you can see now and I've never seen a gym floor look so good in all my years as a professional boxer and trainer. Vuba really are a great company to work with.

”
